

Instructions:

- 1) download zip folder

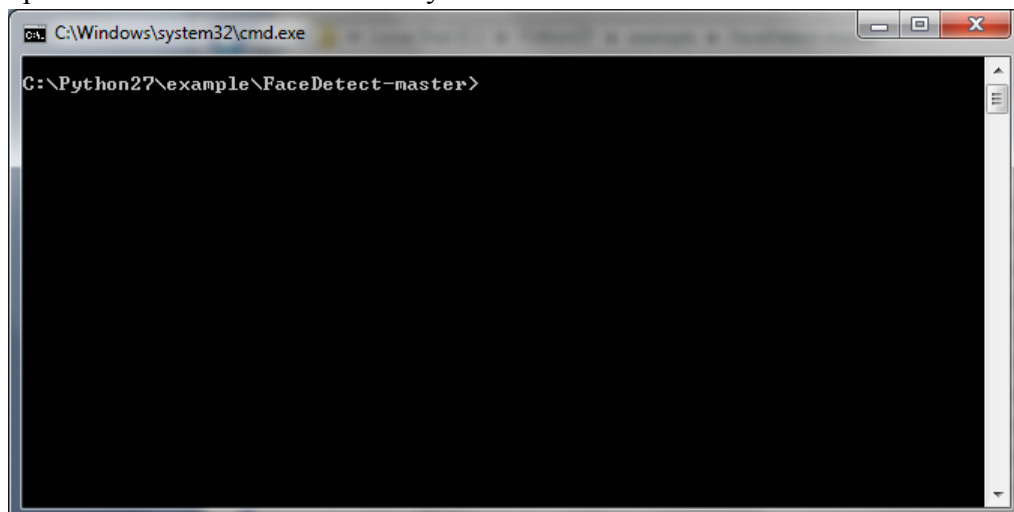

<https://github.com/shantnu/FaceDetect>

- 2) extract it into python folder

For eg: I created example folder in python and extracted the zip folder

- 3) Open command window here only

4) Type this command

```
C:\> python face_detect.py abba.png haarcascade_frontalface_default.xml

C:\Python27\example\FaceDetect-master>python face_detect.py abba.png haarcascade
_frontendface_default.xml
Found 4 faces!
```

You will get with this pop out
